

## LED TUBE OFFERINGS AND OPTIONS – SO MANY VARIABLES – HERE ARE JUST THE BASICS:

### **DIRECT DRIVE LED** LINE VOLTAGE T8 TUBES

DirectDrive LED tubes eliminate the need for an external driver or ballast. For new construction installations, simply connect the 120-277V line voltage directly to the sockets. For retrofit installations, bypass the existing ballast by cutting the wires and connecting the 120-277V line voltage directly to the sockets. No ballast or driver is required

### **SMART DRIVE LED** PLUG & PLAY WITH T8 BALLASTS

It's as easy as changing a light bulb. Simply remove the existing fluorescent lamps and replace with SmartDrive LED tubes. No special instructions, no tools. The LED tubes run off the existing instant or program start electronic ballast. Energy efficiency in an instant. **Also available for T5HO Ballasts.**

### **COMBO DRIVE LED** PLUG & PLAY OR LINE VOLTAGE COMPATIBLE

ComboDrive offers maximum flexibility when upgrading to LED tubes and compact lamps. Plug & Play for ballast compatible operation or remove the ballast and connect line voltage directly to the lamp sockets for bypass operation.

### **SMART DRIVE LED** PLUG & PLAY WITH CFL BALLASTS

LED is no longer just for linear lamps. Smart Drive CFL Replacement Lamps are energy efficient, long-lasting replacements for downlight applications that previously used 4-pin compact fluorescent lamps. Simply plug and play off the existing ballast. Smart Drive CFL Replacement lamps are highly compatible with most ballasts. **Also available for 2-pin CFL**

Choose Smart Drive CFL Replacement Lamps for: Quick and Easy Installation - Recessed Lighting Upgrades - Upgrades for Existing 18W, 26W, 32W, or 42W CFL Fixtures
